PROFESSIONAL EXPERIENCE

Senior IT Support Specialist

Buna Al Khaleej Contracting Company
Sumou Towers Project | Jeddah, Saudi Arabia
September 2025 – Present

Provide enterprise IT support for more than 500 end users within a Windows Domain environment, ensuring high service availability, operational continuity, and efficient IT service delivery. Support business-critical infrastructure, collaborate with infrastructure teams, and maintain secure, reliable technology services while consistently meeting SLA targets and delivering exceptional customer satisfaction.

- Deliver Tier 2 technical support for desktops, laptops, Windows operating systems, Microsoft 365 applications, enterprise software, printers, and network connectivity.
- Administer Active Directory, including user provisioning, password resets, account unlocks, security groups, Organizational Units (OU), Group Policy Objects (GPO), shared folders, and NTFS permissions.
- Administer and support Microsoft 365 services, including Outlook, Microsoft Teams, OneDrive, SharePoint, and Exchange Online, ensuring secure user access, seamless collaboration, and minimal service disruption.
- Manage enterprise printing infrastructure, including print servers, printer deployment, driver management, shared printers, and troubleshooting for Xerox, HP, Canon, and Ricoh devices.
- Provide user onboarding and workstation deployment by preparing user accounts, computers, Microsoft 365 services, printers, and required IT resources for new employees.
- Deliver executive (VIP) IT support for senior management, ensuring rapid issue resolution, minimal downtime, and a consistently high level of customer satisfaction.
- Collaborate with infrastructure teams and third-party vendors to resolve complex technical issues, support enterprise systems, and ensure business continuity.
- Successfully reduced recurring IT incidents by 50–65% through implementing a structured preventive maintenance program and proactive infrastructure monitoring.
- Maintain accurate IT asset inventory, technical documentation, and incident records using ManageEngine ServiceDesk, ensuring effective asset tracking and service quality.

IT Operations Supervisor | Enterprise IT Support

Golden Velvet Establishment
Rawaf Mina Project | Makkah, Saudi Arabia
May 2024 – August 2025

Led enterprise IT operations during one of Saudi Arabia's largest seasonal projects, ensuring continuous availability of mission-critical technology services while supervising technical teams and supporting enterprise infrastructure throughout peak operational periods.

- Supervised a team of 6+ IT technicians, coordinating daily operations, workload distribution, and technical support activities to maintain high service standards.

- Managed incident response, escalation procedures, preventive maintenance, and infrastructure readiness to minimize downtime and ensure operational continuity.
- Supported enterprise IT infrastructure, including desktops, laptops, printers, networking equipment, CCTV systems, access control systems, biometric attendance devices, and IP telephony solutions.
- Collaborated with project managers, technical teams, and third-party vendors to resolve complex technical issues and maintain uninterrupted business operations.
- Prepared technical documentation, maintenance records, operational reports, and IT asset inventories to support compliance and continuous service improvement.
- Coordinated infrastructure deployment, equipment installation, and system readiness activities before project operations, ensuring reliable technology services.
- Improved service reliability through proactive planning, preventive maintenance strategies, and effective coordination of technical resources within a mission-critical environment.

IT Support & Network Specialist

Zahran Market
Alexandria, Egypt
May 2019 – April 2024

Provided enterprise IT support across multiple retail branches, maintaining reliable IT infrastructure, supporting end users, and ensuring business continuity through proactive technical support, infrastructure maintenance, and continuous service improvement.

- Delivered first- and second-line IT support for desktops, laptops, POS systems, printers, scanners, and enterprise software across multiple business locations.
- Administered Active Directory, including user provisioning, password management, shared folders, security groups, and NTFS permissions.
- Performed user onboarding by preparing user accounts, deploying workstations, configuring software, setting up POS terminals, and ensuring users had secure access to required business systems.
- Monitored enterprise infrastructure using PRTG Network Monitor, proactively identifying performance issues and improving system availability.
- Supported network infrastructure, including TCP/IP, DNS, DHCP, HP switches, structured cabling, wireless networking, and enterprise printing solutions.
- Installed, configured, and maintained CCTV systems, access control systems, biometric attendance devices, IP telephony, and enterprise hardware infrastructure.
- Performed workstation deployment, operating system installation, hardware upgrades, software installation, and endpoint lifecycle support to ensure reliable business operations.
- Maintained IT asset inventory, technical documentation, and maintenance records to improve operational efficiency and equipment lifecycle management.
- Collaborated with cross-functional teams to troubleshoot technical issues, support branch operations, and maintain high service availability across multiple business locations.

IT Support & Network Specialist
Arab Computers Company (ACC) – On-site at United Abco Company
Alexandria, Egypt
Oct 2015 – May 2018

- Provided on-site IT support for end users in a corporate environment.
- Installed, configured, and maintained desktops, laptops, and Windows operating systems.
- Supported LAN/Wi-Fi connectivity, printers, and peripheral devices.
- Performed IMAC activities (Install, Move, Add, Change).
- Delivered first-line and second-line technical support while meeting SLA targets.
- Assisted with Active Directory user account administration, password resets, and workstation domain support.
- Managed user requests, hardware replacement, and software installation.
- Coordinated with customer representatives to ensure uninterrupted IT operations.
