Infrastructure: Hikvision CCTV, Dahua CCTV, Access Control, ZKTeco Attendance Systems, Panasonic & Grandstream IP Phones

PROFESSIONAL EXPERIENCE

Senior IT Support Specialist

Buna Al Khaleej Contracting Company
Sumou Towers Project | Jeddah, Saudi Arabia
September 2025 – Present

Provide enterprise IT support for more than 500 end users within a Windows Domain environment, handling 100+ tickets a month and ensuring high service availability, operational continuity, and efficient IT service delivery.

- Deliver Tier 2 technical support for desktops, laptops, Windows operating systems, Microsoft 365 applications, enterprise software, printers, and network connectivity.
- Administer Active Directory, including user provisioning, password resets, account unlocks, security groups, Organizational Units (OU), Group Policy Objects (GPO), shared folders, and NTFS permissions.

- Administer and support Microsoft 365 services, including Outlook, Microsoft Teams, OneDrive, SharePoint, and Exchange Online, ensuring secure user access and minimal service disruption.
- Manage enterprise printing infrastructure, including print servers, printer deployment, driver management, shared printers, and troubleshooting for Xerox, HP, Canon, and Ricoh devices.
- Provide user onboarding and workstation deployment by preparing user accounts, computers, Microsoft 365 services, printers, and required IT resources for new employees.
- Deliver executive (VIP) IT support for senior management, ensuring rapid issue resolution and minimal downtime.
- Collaborate with infrastructure teams and third-party vendors to resolve complex technical issues and ensure business continuity.
- Reduced recurring IT incidents by 50–65% (measured by ticket volume since joining) through a quarterly preventive-maintenance plan and root-cause fixes for repeat faults.
- Maintain accurate IT asset inventory, technical documentation, and incident records using ManageEngine ServiceDesk.

IT Operations Supervisor | Enterprise IT Support

Golden Velvet Establishment
Rawaf Mina Project | Makkah, Saudi Arabia
May 2024 – August 2025

Led enterprise IT operations during one of Saudi Arabia's largest seasonal projects, supervising technical teams and supporting enterprise infrastructure throughout peak operational periods.

- Supervised a team of 6+ IT technicians, coordinating daily operations, workload distribution, and technical support activities.
- Supported and connected 200+ CCTV cameras and 50+ pilgrim-gate entry sensors across the Mina and Muzdalifah camps, linking each device to its control equipment.
- Managed incident response, escalation procedures, preventive maintenance, and infrastructure readiness to minimize downtime.
- Supported desktops, laptops, printers, networking equipment, Wi-Fi and bandwidth management, access control systems, biometric attendance devices, and IP telephony.
- Collaborated with project managers, technical teams, and third-party vendors to resolve complex technical issues.
- Prepared technical documentation, maintenance records, operational reports, and IT asset inventories.
- Coordinated equipment installation and system readiness activities before project operations.

IT Support & Network Specialist

Zahran Market
Alexandria, Egypt
May 2019 – April 2024

Provided enterprise IT support across 18 retail branches, the head office, and warehouses, supporting end users and maintaining reliable IT infrastructure.

- Delivered first- and second-line IT support for desktops, laptops, POS systems, printers, scanners, and enterprise software across all locations.
- Administered Active Directory, including user provisioning, password management, shared folders, security groups, and NTFS permissions.
- Performed user onboarding by preparing user accounts, deploying workstations, configuring software, and setting up POS terminals.
- Monitored enterprise infrastructure using PRTG Network Monitor, proactively identifying performance issues and improving availability.
- Supported network infrastructure, including TCP/IP, DNS, DHCP, HP switches, structured cabling, wireless networking, and enterprise printing.
- Built a MikroTik Hotspot login portal giving mall visitors free guest Wi-Fi after login.
- Installed, configured, and maintained CCTV systems, access control systems, biometric attendance devices, and IP telephony.

- Performed workstation deployment, operating system installation, hardware upgrades, and endpoint lifecycle support.
- Maintained IT asset inventory, technical documentation, and maintenance records.

Help Desk

El Nasr Clothing & Textiles Co. (KABO)
Alexandria, Egypt
May 2018 – May 2019

- Supported employee devices, domain services, the network, and CCTV cameras.

IT Support & Network Specialist

Arab Computers Company (ACC) – On-site at United Abco Company
Alexandria, Egypt
Oct 2015 – May 2018

- Provided on-site IT support for ~200+ users in a corporate environment, including the CCTV cameras and the internal telephone exchange (PBX).
- Installed, configured, and maintained desktops, laptops, and Windows operating systems.
- Supported LAN/Wi-Fi connectivity, printers, and peripheral devices.
- Performed IMAC activities (Install, Move, Add, Change).
- Delivered first-line and second-line technical support while meeting SLA targets.
- Assisted with Active Directory user account administration, password resets, and workstation domain support.
- Managed user requests, hardware replacement, and software installation.
- Coordinated with customer representatives to ensure uninterrupted IT operations.
